Summary

Dynamic and results-oriented Data Engineer with over 4+ years of experience specializing in Azure Data Engineering. Proven expertise in designing and implementing scalable data pipelines, data modeling, and ETL/ELT processes. Seeking opportunities to leverage technical skills and drive innovative solutions in a challenging role.

Experience

Associate Data Engineer | Metyis India | Gurgaon, IN | July 2024 - Present

- Developed and optimized data pipelines using Databricks and Azure Data Factory, processing millions of customer transactions to enable data-driven profitability analysis.
- Architected and implemented Medallion Architecture, ensuring high-quality data integration across bronze, silver, and gold layers for accurate customer insights.
- Led the ABC analysis and EBITA calculations at the customer level, utilizing advanced data modeling techniques to drive targeted pricing strategies and resource allocation.
- Collaborated with cross-functional teams to automate end-to-end ETL processes using Azure Functions and Databricks, streamlining workflows and improving operational efficiency.

Big Data Engineer | Infosys Limited | Pune, IN | August 2021 - July 2024

- Engineered ADF and Databricks data pipelines to efficiently process millions of data points.
- Automated processes using PowerShell scripts, significantly increasing project efficiency.
- Worked extensively with ADLS Gen2, Azure Functions, and Azure DevOps for CI/CD and version control.
- Collaborated with stakeholders to gather requirements and provide technical insights.

Summer Intern | TBI KIET | Ghaziabad, IN | May 2020 - June 2020

- Learned and applied advanced concepts of Object-Oriented Programming (OOP).
- Developed a Python-based personal assistant for user input processing.

- Utilized Python for web scraping to collect data from web applications.

Projects

Customer Profitability Project

- Segmented customers using ABC Costing to identify high-value customers and prioritize resources for maximum profitability.
- Calculated EBITA at the customer level to assess their true profitability, enabling targeted strategies for revenue growth.
- Analyzed profit margins to recommend pricing and cost adjustments, improving profitability across different customer segments.
- Delivered actionable insights that drove data-driven decision-making, optimizing customer retention strategies and increasing overall business profitability.

Universal Data Lake

- Developed and maintained metadata-driven data pipelines.
- Designed a serverless backend using Azure Functions for monitoring and reporting automations.
- Generated new datasets providing insights using Spark and Azure Data Factory.
- Collaborated with stakeholders to gather requirements and provided technical insights for project success.

Qlik Replicate Migration

- Coordinated the decommissioning of the existing SLT system with the Qlik Replicate tool.
- Enabled real-time data delivery for immediate business decision-making.
- Developed the Databricks pipeline to handle the streaming data from replicate for batch processing to use by product and downstream teams.

Education

Bachelor of Technology in Information Technology | Abdul Kalam Technical University | 2021

Cumulative GPA: 8.5/10.0

Relevant Coursework: Data Structure & Algorithm, Database Management System, Operating System, Software Engineering, etc.

Central Board of Secondary Education

Senior Secondary Education | 2016: Cumulative Percentage: 85%

Senior Secondary Education | 2014: Cumulative GPA: 10.0/10.0

Skills

Technical Skills

-  **Programming Languages:** Python (Advanced), Scala
-  **Big Data Technologies:** Apache Spark, PySpark
-  **Cloud & Azure:** Azure Data Factory, Azure Databricks, ADLS Gen2, Azure Functions
-  **Data Modeling:** Star Schema, Snowflake Schema, ER Diagrams
-  **Databases:** SQL Server, MySQL
-  **Version Control & Collaboration Tools:** Git, Azure DevOps Board
-  **CI/CD:** Azure DevOps
-  **Scripting:** PowerShell, Linux Bash scripting
